Priority Action 4: Historic Environment

Identify and improve access to, and appreciation of, the historic environment along the Thames

Archaeology of the Tidal Thames

Nathalie Cohen

MOLA

Thames Vision:

- **Identify** and improve **access** to, and **appreciation** of, the historic environment along the Thames.
- There are opportunities from the Thames Vision to encourage the preservation of the built and archaeological heritage of the Thames and improve access to it. Historic England and others, including the Museum of London Archaeology, are well-placed to work with the PLA and a wide range of other stakeholders to achieve this. There is scope to identify the significance of the river's heritage assets, both designated and undesignated, and to secure their conservation in the context of a busier river.

NOW IS THE SEASON OF THE YEAR TO LEAVE THE STUFFY TOWN, AND IN THE COOL OF THE EVENING SEEK OUT A FRESH AND AIRY SPACE FOR PLEASURE BY LONDON'S UNDERGROUND.

'The Arcadian Thames provides that most special of urban experiences – one that really makes my heart sing. It is a place where humans, history, water and wildlife can get close to each other yet within the confines of the largest metropolis in Europe. That is special'
